Report of the Mayor

To the Citizens of Rutland:

I hereby submit, for your consideration, my sixth annual report as Mayor of the City of Rutland for the year ending December 31, 1924.

Again, through the co-operation of the City Council, we have tried to conduct the affairs of our city for the best interest of the public.

Through the efforts of the City Treasurer, the \$65,000.00 street improvement, sewer and sidewalk bonds were issued at 41¼% as well as receiving a premium of \$584.35 on these bonds.

While we have done quite a lot of work and purchased some new machinery, repaired, painted outside and inside the City Hall Building, we have lived within our means, and have a cash balance on hand, as will be shown in the Treasurer's report, of \$37,512.07. Of this amount \$21,098.00 was saved from the bond account this last season and will be available for next year's work.

The expense caused by the fire at the Dana School Building was \$36,531.26 repairs. The insurance received was \$22,500.00, the city appropriated from the general account \$2,000.00 and the balance was paid for out of the general school funds.

While there was issued this last year \$65,000.00 in new bonds, through the payments of bonds and sinking fund earnings, our bonded debt was only increased \$24,118.90, as shown by the following figures taken from the report of the Treasurer.

This being made up as follows:

Street Improvement bonds, 1924 issue	\$50,000 00
Sewer Bonds, 1924 issue	10,000 00
Sidewalk bonds, 1924 issue	5,000 00
	<hr/>
	\$65,000 00

General appropriation to sinking funds..	\$12,000 00
School bonds Nos. 587-588 paid from general account	2,000 00
Street improvement bonds, Nos. 638-647 paid from general account	10,000 00
Sinking fund earnings	16,881 10
	<hr/> 40,881 10
	<hr/> \$24,118 90
Total bonded debt	\$709,000 00
Less sinking fund, water	\$60,751 09
Less sinking fund, general	193,594 60
	<hr/> 254,345 69
Net bonded debt of city Dec. 31, 1924	\$454,654 31
Net bonded debt of city Dec. 31, 1923	430,535 41
	<hr/>
Increase in bonded debt	\$24,118 90

There has been a great deal of talk for the last few weeks about our high tax rate and how our taxes have increased, much of the blame being laid to the city officials. If the public at election time votes an appropriation for issuing of bonds for one thing or another, all these things have to be paid and cannot be paid in any other way than by taxation, which we try to keep at the very lowest and pay our bills. To correct some of these statements, I have asked the City Treasurer and City Clerk for a statement dating back to the year 1918, showing in detail just how this increase has been brought about and I submit the same to you for your careful consideration.

The net bonded debt of the city December 31, 1918, was \$232,036.37.

The voters have authorized the issue of and the city has issued during the years 1919-1924 bonds to the amount of \$436,000 as follows:

1920, Armory bonds	\$114,000 00
1920, Street improvement bonds	50,000 00
1921, Street improvement bonds	50,000 00
1922, Street improvement bonds	50,000 00
1922, Church Street school bonds	32,000 00
1922, Grove Street widening bonds	25,000 00
1923, Street improvement bonds	50,000 00
1924, Street improvement bonds	50,000 00
1924, Sewer and sidewalk bonds	15,000 00
	<hr/>
	\$436,000 00

The net bonded indebtedness December 31, 1924, was \$454,654.31, showing an increase in the net bonded debt for the six years of only \$222,617.94, notwithstanding that bonds to the amount of \$436,000.00 were issued during that period.

The tax rate for 1918 was \$2.00 on the dollar of the grand list; for 1924, \$3.35 on the dollar. 20% of the 1924 rate was for building the River Street bridge, so that the rate, but for this extra expense, would have been \$3.15, the same as in 1923.

Comparing the expenditures for 1924 with the expenditures for 1918, it will be found that \$97,072.43 of the increase was for expenses over which the city council had no control and for which it should not be held responsible as the following comparative statement will show:

	1918	1924	Increase
State and county taxes	\$17,975 97	\$39,504 99	\$21,529 02
Interest	20,999 83	38,931 23	17,931 40
Schools, per cent of grand list	55	100	
Making an increase reckoned on the 1924 grand list of			57,612 01
			<hr/>
			\$97,072 43

This increase is over 75% of the 1924 grand list and, taking \$3.15 as the normal tax rate for 1924, it shows an increase of only 40 cents on the dollar over the 1918 rate, a showing to which the 1924 administration may point with a reasonable degree of satisfaction considering the inevitable increase in expenses accompanying the increase in the city's population and the changes brought about by the necessity of increased fire and traffic protection.

I cannot but feel that the people of Rutland, after reading the detailed report of our City Treasurer, will be well pleased with the showing that has been made the past year in the different departments of our city and that the money has been well expended.

PUBLIC WORKS DEPARTMENT

This department, under the supervision of Joseph P. Feeley, has done a large amount of work, and at a price that I doubt can be equalled by any city the size of Rutland.

One of the biggest undertakings that was ever carried out in our city, by this department, was the construction of River Street bridge. The cost of this bridge to December 31st was \$47,604.00; the completed cost will not exceed \$55,000.00; our estimated cost was \$60,000.00. Five-sixteenths of the cost of this bridge to be paid by the Rutland Railroad Co., and three-sixteenths by the Delaware & Hudson Co., the other one-half by the city. These two companies have paid to date \$22,500.00, our share being raised by an extra tax of twenty cents on the Grand List, no bonds being issued.

The department built a new concrete road and relaid the marble curbing on Merchants Row from a point opposite the Rutland County Bank, to a point just south of City Hall, including the intersection of Washington and Center Streets; built a concrete road on South Main St. from Madison St. to the intersection of Strongs Ave.; put a Kentucky rock asphalt top on Center St. from Merchants Row to Wales St. The

cost of all this work was \$29,506.02, taken from the bond issue.

We have built in the last four years $8\frac{1}{2}$ miles, or 88,946 sq. yds. of cement concrete roads. The average cost of building these concrete roads ourselves, since Mr. Feeley supervised this work, has been about \$22,000.00 in comparison with anywhere from \$40,000.00 to \$50,000.00 per mile charged by contractors. One big item that helps reduce the cost, is our having our own quarry and crushing plant producing a grade of stone that is superior to any in this country.

We have laid, as shown by this department, \$5,092 lineal ft. of sewers, encountering on three of these sewers most everything from solid ledge, boulders to quick sand. I refer to one on north end of Baxter St., West St. below Cramton Ave., Lincoln Ave., north of North St., to North Main St. In laying this last sewer, we encountered Tenney brook and numerous other construction problems requiring continuous pumping and sluicing, crossing the brook six times at different points, the sewer in the brook being laid with cast iron pipe calked with lead and oakum.

We have in this department a complete survey of all the dirt roads in the city, giving the name of street, length and width.

We have graveled 41,674 sq. yds. or about eight miles during the past two winters, at a time when we were not using our trucks or men on other work, eliminating the spring mud, and it has worked out very well.

There is kept in the Engineer's office a complete construction record system, which shows each day the money and material expended in the numerous operations, complete costs of each job, costs of operating mobile equipment and unit costs for estimating new work, large maps of the sewer and water system, a complete record of the Mendon watershed, a card index system showing all gates and valves on the water system, location, kind and pressure of each hydrant in the city.

My orders to all departments have been to economize and give to the citizens of Rutland full value for each dollar spent

and, if this policy has not been carried out, it is not because we haven't tried to do so.

We have on hand \$20,034.55 of construction equipment that has been bought and paid for, the same being kept in repair by our own mechanics at a big saving to our city.

WATER DEPARTMENT

This department, under the supervision of Francis Tracy, has been well taken care of. Several new hydrants installed, new mains laid, including a new six-inch main on Evelyn St., partly completed, preparatory to paving this street in the early spring. This work requires some extra work in thawing the ground, but this expense is more than offset by our not having to shore the sides of the ditch with planking, which we would be obliged to do in the spring time on account of the nature of the soil.

The reservoir was thoroughly cleaned of all dirt and sediment, gate house and valves repaired; all hydrants are well looked after during the cold winter weather.

We have set out this last year on our watershed about 80,000 trees.

DEPARTMENT OF PUBLIC SAFETY

This department in charge of Commissioner Fred C. Roberts, has been well taken care of.

The Fire Department answered 162 alarms, with a large fire loss amounting to \$193,348.00, brought about by three big fires, the Lincoln Iron Works, The Tuttle Company and Methodist Church. These were all serious fires and were well handled by the department, anyone of which might have been much more serious.

There was purchased for this department this last year a new American-LaFrance six-cylinder motor combination chemical, hose and pumping engine at a cost of \$12,500.00, not including some extra equipment. We received a credit of \$500.00 on

the above apparatus for the steam fire engine, the same to remain in the department indefinitely.

This department lost last September a most valuable man in the death of Chief John P. Reedy, an efficient and faithful firefighter, who gave of his health and strength for others. This department was extremely fortunate in having a man who was assistant to Chief Reedy to take up this work, Alfred H. Koltonski. I am proud of this department and all the men connected with it.

The Police Department, under Chief E. H. Lawson, has been well taken care of, especially the traffic and parking business, which is some problem today and increasing every year. The Motor Cycle and Police Signal System are a great help to this department.

DEPARTMENT OF CHARITIES AND CORRECTIONS

This department has been well looked after under the supervision of Mr. and Mrs. Hickey and the money well expended. I doubt if any city the size of Rutland runs this department any more economically than this one and, at the same time, they try to give the services they are called upon to render.

MEMORIAL HALL

The same appropriation, \$4,500.00, was made to the Library and the ladies in charge had a hard time to meet their expenses, due to increase in salaries and other overhead expenses.

The circulation is increasing each year and, as I have said before, I hope some time we may be able to have a building that is better adapted for this purpose.

CONCLUSION

In conclusion, I desire to express my appreciation to the Honorable Board of Alderman for their co-operation in conducting the affairs of our city and the friendly relations that have existed.

To the Treasurer of the City, City Clerk, the heads of the different departments, as well as to the different foremen and men connected with them, I extend my gratitude and thanks for all their assistance.

Respectfully submitted,

JAMES C. DUNN,

Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1924.

RECEIPTS

Taxes received by City Treasurer.....	\$422,484.97
Water, schedule rates.....	23,596.02

Respectfully submitted,

CHARLES M. SMITH
CHARLES H. LONDON
HENRY F. FIELD

Sinking Fund Commissioners.

Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen: In accordance with the provisions of the City Charter, I submit herewith the annual report of the Commissioner of Public Works for the year ending December 31, 1924.

ORGANIZATION OF THE PUBLIC WORKS DEPARTMENT

Office force:

R. H. Royce, Engineer

F. L. Rice, Engineer

C. C. Bentley, Clerk

J. H. Davies, Assistant Clerk

Frank Tracy, Superintendent of Water

James McLaughlin, Foreman of Streets and Sewers

Roy Leonard, Foreman at Crushing Plant

John Conner, Foreman of Bridge Construction

Leslie Gray, Foreman of Bond Issue Construction.

BOND DEPARTMENT

The Department of Public Works surveyed, designed and supervised the construction of all work completed under the paving bonds issued for 1924, also the maintenance of all work completed under the bonds issued in 1920, 1921, 1922, 1923 and 1924. This maintenance consisted of cleaning and filling all joints and shrinkage cracks with a bituminous filler.

A part of Strongs Avenue and a part of Merchants Row were paved from the extreme southern end of the existing brick

paving in front of the City garage on Strongs Avenue, a distance of 1,083 feet northerly to the existing brick paving on Merchants Row, with a 1-2-4 mix, 7-in. uniform thickness, cement concrete reinforced with 45-lb. steel road mesh section 4 in. x 8 in. The pavement varied in width from 46 feet to approximately 60 feet. The old marble curb was removed, dressed and reset, and the city should receive another term of service from same.

The old pavement was in very poor condition, full of pot holes and the surface badly broken up. The drainage system was very poor and a new system was designed and installed with proper catch basins and manholes.

The Rutland Railway, Light & Power Company was granted permission from the Board of Aldermen to discontinue one track and place a single track in the center of the traveled way. This change has improved conditions and relieved traffic congestion. The new road bed for the Rutland Railway, Light & Power Company track consists of new ties embedded in concrete 6 in. below the ties, 6 in. around ties and 7 in. above the ties, all rails were bonded to eliminate electrolysis so far as possible.

An 18-in. Akron pipe sewer was located at the intersection of Washington Street and extends about 200 feet easterly on Washington Street to a dead end. No sewage flows into this pipe and I can see no reason why this sewer was ever installed.

Grading on this project was begun June 5, 1924, and the pouring of cement was finished June 28, 1924, a total of 20 working days on the pavement proper.

All water services were renewed and a complete survey made of all pipes, valves and gates showing location of same.

The materials used were all local except the cement and reinforcing steel, and these were purchased through local dealers.

Sand was drawn from the Barker pit at Mendon, and the stone from the City Crushing Plant on Pine Hill. The Iron Clad and Knickerbocker brands of cement were used. All cement and sand were tested by the City Engineer at his office,

the sand for impurities and silt content, and the cement for tensile strength. A record of the tests is on file for future reference.

Another cement concrete pavement was constructed on South Main Street, known as "Gouger Hill." This section of pavement connects the work of 1921 and 1923, and we now have a continuous strip of reinforced concrete pavement from the north city line to the south city line. This pavement was a 1-2-4 mix, 7-in. uniform cement concrete, reinforced with four steel bars $\frac{7}{8}$ -in. in diameter running longitudinally and two $\frac{1}{2}$ -in. deformed steel bars laid transversely every 50 lineal feet. This pavement varied from 16 feet on the steep slope to 18 feet southerly beyond the concrete bridge over Moon Brook. Cary elastite was used for the expansion joints on all pavements constructed this year.

This section of South Main Street had a drainage system installed and all water services relaid where necessary. A heavy cut was necessary for about 200 feet and a 4-foot fill for a distance of 350 feet to meet the grade of intersecting streets.

CENTER STREET ROCK ASPHALT

Center Street, between Wales and Merchants Row, was wearing rapidly and upon investigation it was deemed advisable to save the old asphalt base and replace with some type of asphalt wearing surface. The cross section showed that the crown could be raised from $\frac{1}{2}$ -in. to $1\frac{1}{2}$ -in. but the curb would have to remain the same. The problem was to find a wearing surface that could be applied from $\frac{1}{2}$ -in. thickness to $1\frac{1}{2}$ -in., and as this is an exceptionally busy street, to eliminate as far as possible the number of days the street would have to be closed.

Kentucky Rock Asphalt was decided upon, and the material was ordered in January to be delivered in Rutland about July 17, 1924.

This material consists of 7% bitumen and 93% silica sand mixed by a natural process and will neither creep nor run in

warm weather. The manipulation is the most important item, and while the operations are simple, care has to be observed to get proper bond contact with the old surface, and to have the material perfectly free from dampness before rolling. This office has received numerous compliments about this paving material and whereas it is reasonable in application and cost it may be manipulated very rapidly. Construction on Center Street required only 6 working days, and traffic was allowed on the pavement two hours after final rolling.

Bituminous macadam was laid on Engrem Avenue, the specifications being similar to those used by the Federal government on Federal Aid pavements. This pavement consists of broken stone of various sizes spread over the sub-base and properly rolled with a 12-ton roller and penetrated with a hot bituminous binder covered with stone sweepings, and a seal coat of hot asphalt poured thereon.

All water services, drainage and necessary sewer, man-holes and catch basins were installed before laying of the pavement. Tabulation of work completed is as follows:

*Merchants Row, 7,200 sq. yds.	\$16,606 63
*South Main Street, 3,492 sq. yds.	8,142 78
*Center Street, 2,482 sq. yds.	3,350 11
*Engrem Avenue, 2,400 sq. yds.	3,371 83
*Cleveland Avenue, 21 cu. yds.	210 19
	<hr/>
	\$31,681 54

*Cost includes grading and excavation of base.

The total amount of paving under the bond issues is as follows:

	Sq. yds.		Per sq. yd.
1920 Contract work	11,340	\$50,013 71	\$4 42
1921 Contract work	11,991	43,274 32	3 62
*1921 Public Works Dept.	1,824	3,677 32	2 015
*1922 Public Works Dept.	21,384	41,429 65	1 93
*1923 Public Works Dept.	24,100	51,848 86	2 15
**1923 Public Works Dept.	2,733	6,182 63	2 23
*1924 Public Works Dept.	15,574	31,471 35	2 02
	<hr/>	<hr/>	
	88,946	\$227,897 84	

ASPHALT

1924 Public Works Dept., 2,482 sq. yds. \$3,350 11 at \$1.309

BITUMINOUS MACADAM

1924 Public Works Dept., 2,400 sq. yds, \$3,371 83 at \$1.40

We have on hand at the Post Street Yard 1,000 lbs. of reinforcing steel at 5c. = \$50.00, and 9,000 feet of expansion joint at .143, = \$1,287.00.

STREETS

The small tractor demonstrated again this year its superiority over the horse method for scraping and grading our dirt and gravel roads. An experiment was tried last winter of resurfacing a number of our dirt streets with gravel and the amount of work accomplished and the application of the gravel base was applied at such a moderate outlay of funds that the same method will be continued during the winter season of 1925. Doing this work keeps costly equipment working 12 months and dubious as it may seem the work is less costly during the

*Cost includes grading and excavation of base.

**Name of Grove Street changed to Merchants Row.

winter months than in the summer. The material excavated from Merchants Row was utilized in the resurfacing of a number of streets and the balance of this excavation was hauled to North Main Street to widen out numerous fills in this section.

The patrol system was continued and the waterbound and oiled gravel streets patched and maintained with a cold patch of asphalt base.

Standard No. 5 cold application of asphalt was applied to all streets that required treatment. This application was covered with sand immediately after, and only one application was necessary. The dust nuisance was reduced to a minimum and the complaints received at this office were few. The asphalt cost was increased over last year. Application was by power spreader furnished by the Standard Oil Company of Albany, N. Y.

Water sprinkling was done in the business section with our horse-drawn motor flusher.

Calcium chloride was applied to those streets suitable to receive it that petitioned for this dust layer.

Snow was removed from the business sections when conditions warranted.

The following is the amount of snow that fell in Rutland during the months of January, 1924, to May, 1924, and from November, 1924, to January, 1925.

January	6.8 inches
February	22.0 inches
March	3.1 inches
April	16.5 inches
November	8.8 inches
December	4.6 inches
Total	61.80 inches

Snow was removed five times from the business section and disposed of through the manhole into the 54-in. trunk sewer on

West Street. Large drifts were removed from the following streets: Woodstock Avenue, Allen Street, Stratton Road, Perkins Road, and Curtis Avenue.

The removal of snow is getting to be a major problem and the public demands each year are increasing. The automobile requires partially cleaned streets and the amount of funds necessary for an appropriation will depend on the area to be covered.

SIDEWALKS

Petitions for cement concrete sidewalks were received in large numbers and as each petition was approved a survey was made, the square yardage calculated and a filing number placed on an index card with date. These petitions are acted upon, the sidewalks constructed in the order in which they are approved. Before the operations are started a cost sheet is submitted to the City Treasurer and he bills each property owner for the amount as estimated. The work of constructing the sidewalk is begun after payments are made to the City Treasurer.

Snow was removed from sidewalks by plowing and when necessary sand was spread.

SEWERS

The sewer system is called to your attention again as being in a deplorable condition. The design as planned in 1923 has been carried on throughout the past year at odd times or when conditions warranted. We now have the main system complete and the Moon Brook system will be completed early in the season of 1925.

The sewer system designed for the north end of Baxter Street has been installed and has made a decided improvement in the sanitary conditions in this section.

Another piece of sewer construction that had been petitioned for the last 18 years by residents of West Street, west of Columbian Avenue, was completed early in the spring. This

was also a much required improvement, from a sanitary and drainage standpoint.

A petition was received from your board requesting a sewer plan and development of that section east of Lincoln Boulevard, along Tenney Brook and extending both north and south on North Main Street. It was necessary to drive a tunnel across Main Street fifty feet north of Tenney Brook culvert. This tunnel construction eliminated the necessity of detouring traffic, which at that section is very heavy.

The sewage and drainage system for Evelyn Street has been surveyed and designed, and construction will be under way early in 1925, so that all underground work will be completed before the summer of 1925, thereby allowing all ditches to settle before the pavement is laid on it.

The trunk sewer along Baxter Street caved in again this year and I can only repeat my recommendations in last year's report that this sewer will have to be replaced at a greater depth or reconstructed with a concrete jacket. The protection from this jacket will eliminate further repair for a number of years.

The Pine Street sewer from West Street to Forest Street is badly deteriorated, and as this sewer is our main trunk from the business section, a cave-in or stoppage in any part of this sewer would be disastrous to the main system. A committee from your board should investigate the above conditions and ways and means devised to at least construct a small portion of trunk sewer each year.

REPORT OF THE ENGINEERING DEPARTMENT

The time of the Engineering Department was principally occupied during this year on the following:

The preparation of drawing showing in detail the entire proposed construction of River Street Viaduct, and supplying the necessary field measurements and data to build it.

The preparation of plans and field work necessary to the construction of concrete pavement on South Main Street and Merchants Row.

The preparation of plans and field work for the bituminous pavements on Ives Avenue and on Engrem Avenue.

The preparation of plans and staking out of Curtis Avenue for next year's concrete pavement.

The preparation of plans and staking out of Evelyn Street for next year's concrete pavement.

The laying out of many sidewalks constructed this year and the accompanying office work.

The field work and plans necessary for the asphalt pavement on Center Street.

The surveys, plans, profiles, grade, etc., for all new sewer work, as well as locating old sewers for record whenever uncovered.

The application of oil as a dust layer on the streets and the resulting compilation of bills against the abutting property owners.

The gathering of data such as running profiles of all streets in order to develop a comprehensive sewer system for the entire city, the plotting of same and calculating sizes of future pipes.

Also in the regular routine of giving street lines and grades when such were available, adjusting claims, checking material and other incidentals.

CITY DUMP

West's disinfectant was used each day and sprayed over the dump by the attendant.

POST STREET YARD

Our municipal storage yard at Post Street has functioned this year, and while our storage space is limited, we are able to have a space allotted for each piece of equipment and to separate the different kinds of pipe, lumber, brick, etc.

PINE HILL QUARRY

The quarry at Pine Hill supplied all crushed stone consumed by the Bond, Sewer, Street, Sidewalk Departments, and for the construction of River Street Viaduct. The plant is operating at a disadvantage in regard to proper housing facilities. The power house is nothing but a shell which was removed in sections from the old quarry at the north end of Lincoln Avenue, and has been in continuous use since 1914 or 1915. The bins are constructed of 6 x 6 section of spruce timber and these timbers have been stressed beyond their limit and are badly warped; in fact we have a slight list to the south. A new power house with proper receiving bins should be constructed during the year of 1925.

CITY HALL GARAGE

The City Hall Garage was completed during February and one section is used exclusively by the Fire Department and the balance by the Department of Public Works for storage of all motive equipment and repair shop.

NEW STREETS

No streets were accepted by the Board of Street Commissioners this year, and it is the unanimous opinion of the Board that acceptance of highways should be considered with great care, due to the large mileage of streets that are now undeveloped. We have some highways in the city that have received the minimum of improvements and the old accepted highways should have the first consideration in the expenditure of street funds.

STREETS DISCONTINUED

That portion of Spruce Street Extension, from the intersection of the south line of Franklin street 506.8 ft. southerly, measured in the east line of Spruce Street Extension, and 498.9 ft. southerly from the intersection of the south line of

Franklin Street and the west line of Spruce Street extension, measured along the west line of Spruce Street extension, was discontinued by the Board of Highway Commissioners July 7, 1924.

RIVER STREET VIADUCT

A report was submitted relative to the condition of River Street Viaduct early in the year and a further examination was made which revealed the fact that the bridge was depreciating rapidly and had reached a condition such that the City Engineer refused to assume the responsibility for the safety of the structure. Findings were reported to His Honor, the Mayor, and it was deemed advisable to consult with the State Engineer, as the structure was on selected highway No. 5. An engineer from his office corroborated the findings of the City Engineer and the bridge or viaduct was condemned and closed to all traffic on April 12, 1924. The old structure was a type of construction known as a through plate girder and was erected by the Hilton Bridge Company of Troy, N. Y., in the year of 1886, and opened to traffic in 1890, at a total cost of \$17,415.20. The Bennington & Rutland Railroad Co. paid \$1,168.60 of this amount, the Delaware & Hudson Co. \$3,005.79, and the Rutland Railroad Co. \$3,924.39. The old foundations consisted of marble slabs. Floor beams were 18-in. I beams. The deck stringers were 4½-in. railroad rails, and wood planks were laid transversely on these stringers. The columns were built-up angles latticed throughout. Two of the girders directly over the main line tracks were in the process of deterioration and had developed large holes in the web sections. Scales of large size were noticeable on all girders and rivets were scaled and pitted, and would not submit to test.

The gusset plates and stiffeners were also in poor condition. The foundations were badly checked and had settled. The whole structure had developed a thrust to the north.

Joint meetings were arranged with representatives of the Rutland Railroad and the Delaware & Hudson Railroad Com-

panies. An estimate was submitted by the City Engineer for the reconstruction of the viaduct. Plans were designed in the office of the Commissioner of Public Works and approved by the Chief Engineers of both railroad companies, for two 80-ft. through plate girder sections, with 20-in. floor beams, and five 40-ft. reinforced concrete sections, with 7½-in. reinforced concrete deck and a wearing surface of 3-in. creosoted wood-block paving, with a solid sidewalk rail of reinforced concrete continuous throughout the entire length of the bridge. The piers are reinforced concrete arched type with one steel pier of built-up section with connecting strut angles. All exposed steel will be covered with a 2½-in. gunite with a galvanized mesh reinforcement of .06 sq. in. per foot of width. The nineteen sheets of complete plans are on file in this office and cover all details of the construction.

An estimate cost of \$60,000.00 for the structure was submitted to your board and accepted by officials of both railroads payable as follows:

City of Rutland	\$30,000 00
Rutland Railroad	18,750 00
Delaware & Hudson Company	11,250 00

All work to be performed by the Department of Public Works and all materials furnished by the City of Rutland.

The old structure was razed during the period from June 22, 1924, to July 1, 1924, and work on the proposed viaduct was under operation July 22, and practically completed with the exception of the guniting, on November 20, 1924. The viaduct was open to pedestrian traffic on November 30, 1924, and open to vehicular traffic on December 31, 1924. Guniting will be started in the early spring or as soon as weather conditions permit.

A complete set of plans and specifications were delivered to the Chief Engineers of the Rutland Railroad Company and the Delaware & Hudson Railroad Company, for their files.

An approximation of the amount of material used in the viaduct is as follows:

138,404 lbs. of reinforcing steel
230,942 lbs. of structural steel
438 sq. yds. wood block
9,600 bags cement
1,700 tons stone
900 cu. yds. screened sand
14,000 sq. ft. gunite
15,000 sq. feet 2-in. x 2-in. mesh
700 lineal feet guard rail
20,000 board feet lumber.

The new viaduct is designed for two 15-ton trucks with 30% impact or a 20-ton roller. The maintenance cost on the viaduct will be negligible and will merely require sealing all expansion joints each Fall, both on the roadway and sidewalk section.

WORK PERFORMED FOR OTHER DEPARTMENTS

Police Department

Police lanterns were taken care of by the Street Department and repairs made on silent policemen.

Fire Department

Ashes were removed from the cellar in Fire Station No. 1, during the course of the year. New doors were designed and installed. A large amount of hose was hauled from the scene of large fires.

NEW EQUIPMENT

A rebuilt Mack truck (2½-ton) was purchased and used on the Bond and Viaduct construction work.

An air compressor size 8 x 6½, capable of delivering 165 cu. ft. of free air per minute, was also added to the Public

Works Department. With this portable machine, which is mounted on rubber-tired chassis, it is possible to move it rapidly from one operation to another. This is a piece of equipment that will pay for itself in a few years and is available for use in all departments.

WATER DEPARTMENT

The upkeep and improvement of the water department has been continued as in past years as follows:

The new 10-in. main laid in 1923 on Strongs Avenue from the brick pavement to Washington Street, was connected to the 12-in. main at the corner of Merchants Row and Washington Street.

A 6-in. main was laid on Merchants Row to connect the 12-in. main at the foot of Center Street with the 6-in. main on Evelyn Street, a distance of 68 feet.

All the services on Merchants Row between brick pavements where cement pavement was laid were relaid new with all necessary connections, shut-offs and curb boxes. All valve and valve boxes on mains and branches were repaired and put in order. The blow-off on the 12-in. line near the Mead building was replaced by a new one.

A 6-in. extension of the main on Lafayette Street was completed for a distance of 275 feet, with necessary tees and valves at intersections between those points to replace the $\frac{3}{4}$ -in. main, which was too small to supply the increasing number of houses in this locality. All the services with necessary connections were transferred to the new main. The excavation for this main was 50% rock. A 6-in. main on Spruce Street north of River Street, a distance of 377 feet to replace old 3-in. main and extend to the siding of the Rutland Railroad, was laid and all necessary connections and services were transferred to the new main and a two-way hydrant installed near the end of the main. The 6-in. main on Norton Place was extended a distance of 36 feet. The 6-in. main on Harrington Avenue, from the intersection of Ross Street to a point near Considine's house, a distance of 416

feet, was laid. A blow-off was provided on the end of this main with suitable shut-off and drain. About 50% of this excavation was 7 feet deep due to necessity of future lowering of grade of street.

An extension of the 6-in. main on Chaplin Avenue, a distance of 36 feet, was made necessary by the installing of a new hydrant at this point.

The 6-in. main on Lincoln Avenue was extended from hydrant north of culvert to connect with 6-in. main running south from Vernon Street. This is completed a distance of 170 feet and there remain 140 feet yet to be laid. This is practically all rock excavation and 40% of the distance was 7 feet deep due to future lowering of the grade of street.

Replacement of 4-in. main on Evelyn Street by a new 6-in. main from Freight Street to watering trough near Merchants Row has been completed, a distance of 120 feet.

All mains laid have been supplied with necessary valves and valve boxes.

A new two-way hydrant was installed on Spruce Street at the end of 6-in. main near railroad siding.

A new two-way hydrant was installed at the corner of East Street and Engrem Avenue.

A new two-way hydrant was installed at Clover and South Main Streets.

A new two-way hydrant was installed on Chaplin Avenue near Newman's Garage.

A new two-way hydrant was installed on Water Street north of State Street where a 6-in. main was laid to replace a small 1-in. main a distance of 100 feet to supply this hydrant and give greater water supply to the residents of Water Street.

A total of 1,784 feet of 6-in. main was laid and new hydrants installed totaled 6.

The hydrant on old Union Street, which was inside of a high fence enclosure was moved a distance of 30 feet to a point accessible to fire when needed.

The mains at the intersection of South Main Street and Killington Avenue and South Main Street and Clover Street were connected with 12-in. main on South Main Street.

All service on South Main Street between Clover Street and Strongs Avenue were relaid new and all valves and valve boxes repaired and put in working order.

All broken services throughout the city were relaid making a total of 80 services relaid.

There were 47 new services laid.

All miscellaneous repairs of hydrants, curb boxes and valve boxes, valves, watering troughs and drinking fountains were made as required.

Five old or broken hydrants were replaced with new.

The Gleason reservoir was thoroughly cleaned and repaired and also the large Mendon reservoir was cleaned and riprap pavement repaired where needed and the two large intake valves at gate house repaired and put in proper working order.

All other repairs such as meters, patrolling of mains, caulking leaks in mains, etc., were made as soon as possible.

The chlorination of water and Ortho-Tolidine test and analysis of the city water have been very satisfactory.

25,000 Scotch pine and 55,999 Norway spruce trees were set on the watershed.

The following tables show amount of work done in each department:

BOND DEPARTMENT

RECOMMENDATIONS

Wasted water in this city is absolutely unnecessary and it seems that the City Council should investigate the advisability of installing a Venture meter at the gate house of the 5,000,000 gallon reservoir to further control and measure the flow of water to the city proper, and make a complete record of flow for every 24 hours' duration, the reports to be filed in the Public Works Department for study to make recommendations; also that the Mendon stream be gauged or weired to measure the flow of water both in dry weather and flood seasons. A city of this size should not consume over 75 gallons per capita per day, and I assume from deductions that we are consuming between 135 and 150 gallons per capita per day.

SNOW REMOVAL

The number of motor vehicles and the discontinuance of the street railway have created a situation that will require a great deal of study to properly solve the problem of snow removal from our principal streets, and from the outlying sec-

tions, especially in the east of Rutland. The cost of snow removal per mile is problematical and will depend on the territory covered and the width of the traveled way. An appropriation should be included in the budget and a committee appointed to investigate thoroughly the numerous details to be worked out. This department will have cost data to submit to your honorable board in the early spring relative to the cost of snow removal.

PINE HILL CRUSHING PLANT

That a new power house be constructed at Pine Hill Quarry to properly house the valuable machinery now installed at the plant and a powder house be designed and erected that will be both fire and bullet proof, to store our supply of dynamite and caps, so that the hazard will be at a minimum.

The Dorr Bridge will require close inspection again next year, and should be replanked at an early date. This office has limited the load to 3 tons and routed all heavily laden trucks traveling south by way of State Street, Columbian Avenue, West Street and across the Ripley Bridge.

It will be economy to replace the plank on the Ripley Bridge with a creosoted wooden plank deck and apply a wearing surface of 3-in. wood block paving. The cost will be slightly greater than the type of construction now used but the maintenance cost for ten years or more will be very small, whereas now the maintenance cost on the bridge deck is excessive.

The wooden bridges on North street and Granger street are in dangerous condition and should be replaced with modern bridges designed to carry a 20-ton load.

Survey all street lines, have same definitely defined, recorded and marked by plainly recognizable markers. At present many street lines are not recorded, their exact location is a matter of dispute, and the only data which might clean up the situation is often so contradictory as to be of no value. If the

city should be surveyed and street lines established, legally adopted and plainly marked, it would be money well spent.

Another source of expense is the present system of assessing for street oiling, which requires the property owners to pay one-third of the total cost of the oil applied in front of his or her property. This cost varies with the width of the traveled way, the amount of frontage, and the number of applications. This necessitates a great deal of time, computing each individual bill. The city of Burlington does this oiling by a general tax and this city would do well to investigate their method, thereby saving considerable work in this department and in the office of the City Treasurer.

In closing this report I wish to thank the members of the organization for their excellent work and co-operation; also Fire Chief A. H. Koltanski for his valuable advice in the numerous lighting matters he has been consulted on.

To his Honor, the Mayor, and the Honorable Board of Aldermen, I also express my appreciation of the support they have given me in performing the duties of this office.

JOSEPH P. FEELEY,

Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

I hereby submit my report, as Commissioner of Public Safety, of the Fire and Police Departments for the year ending Dec. 31, 1924.

The Fire Department is composed of the Chief Engineer, Assistant Engineer, two captains, nine regular firemen, twelve call men and one steamer engineer.

The Chief Engineer, Assistant Engineer, one captain and six men are located at Station No. 1, and a captain and three men at Station No. 2.

The department answered 162 alarms during the year, the largest number in our history, with four serious fires, which brought our total loss for the year to \$193,348, the largest loss, \$125,000, being the Lincoln Iron Works storehouse, which occurred in November. Three new boxes were added during the year, and several will be installed during the coming year.

The addition of the new truck during the year has added materially to our equipment, and with the additional man has enabled us to maintain three crews so that with ordinary alarms, one piece of apparatus with crew is always at one of the stations ready for additional calls.

Weekly inspections of the business district were made by Fire Marshal Koltonski, and continued progress is being made in teaching the public the necessity of constant attention to eliminating every possible unnecessary fire hazard.

The compressor at Station No. 1, which furnishes power for the Fire Alarm, has about reached the limit of its usefulness, having been in use for about 19 years, and will have to be replaced during the coming year.

In the death of Chief Reedy, which occurred after a long illness in September, the department lost a very valuable and faithful man. He gave more than twenty years' devoted service to the department, and in his death the city sustained a real loss.

An inventory of equipment and supplies on hand shows a total of \$44,586 25.

The disbursements for the year are as follows:

Pay roll	\$20,185 12
Repairs and supplies	177 54
Auto repairs and supplies	523 40
New equipment	12,920 79
Fuel	240 60
Light and power	271 50
Laundry and telephone	146 03
Team hire, winter 1923-24	299 50
Sundries	435 64
Insurance	100 00
Commissioner's salary	100 00
	<hr/>
	\$35,400 12

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, one Night Chief, ten regular patrolmen and a motorcycle policeman.

There were 232 arrests made during the year, 126 for intoxication, 33 for breach of the peace, 28 for violation of auto traffic regulations, 9 for violation of liquor laws and 36 for all other offenses.

Three hundred eighty-seven people were given lodging, 80 of them during the month of December.

Fifty-eight doors of business places were found unlocked and owners notified.

The automobile traffic has reached a point where it demands more from this department than all other duties combined, and

the parking situation is each year becoming more of a problem, and I would recommend that the department be reorganized to the extent that this important matter be given the best possible attention.

An inventory of property and supplies on hand shows a total of \$6,210.00.

The expense of the year is as follows:

Pay roll	\$18,723 95
New equipment	169 52
Repairs and supplies	629 34
Miscellaneous	205 77
Telephone	37 85
Commissioner's salary	100 00
	<hr/>
	\$19,866 43

Respectfully submitted,

FRED C. ROBERTS,
Commissioner Public Safety.

A. H. KOLTONSKI, Chief.

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 31, 1924.

No suits were brought against the city during the year. One claim was made against it for damages on account of a car owned by John E. Parker going over an embankment at a culvert on Mussey street. This claim, however, was settled without litigation.

Considerable time was spent by the City Attorney in advising and assisting the city officials in arriving at an agreement with the Rutland Railroad Company and the Delaware & Hudson Company for the construction of River Street bridge. Under the agreement finally executed, the expense of constructing this bridge was paid for, one-half by the city, and one-half by the railroad companies.

Several suits were instituted by the City Attorney in behalf of the city for the collection of delinquent taxes. Two prosecutions were brought by the City Attorney for violations of city ordinances; one against Louis Pantos for displaying merchandise for sale on Center Street, and one against R. G. Douglass for carrying passengers for hire without having obtained a license.

During the month of June, proceedings were brought before the Highway Commissioners under which a portion of Spruce Street, lying between Franklin and River Streets, was discontinued.

The city has one suit now pending in the Supreme Court which was brought against it during the year of 1923, by John F. Smith to recover for the board and lodging of two men, Julius I. Grover and Benjamin Trudeau, who were committed to the Rutland County jail.

In the month of November, the Rutland Railway, Light & Power Company announced that it would discontinue operation of its street cars on December 1st. Subsequent to this announcement a Committee appointed by the Board of Aldermen met officials of the Railway Company and it was arranged to have the trolley service continue through the holidays and until December 27th. A thorough investigation of this matter was made by the City Attorney, but it seemed inadvisable for the city to bring any action to test the right of the Railway Company to discontinue this service.

During the year several insane paupers have been committed to the State Hospital at Waterbury and the Brattleboro Retreat for treatment. These commitments have been made through the efforts of the Overseer of the Poor and the City Attorney, and the city thereby relieved from liability for their support.

Throughout the year the City Attorney has frequently been called upon to advise and assist various officers of the city and it has always been a privilege and a pleasure to render such assistance as was in his power.

Respectfully submitted,

CLAYTON H. KINNEY,

City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1924:

Appropriation	\$8,000 00
Credits paid to City Treasurer	210 13

CAUSES OF DEATH

GENERAL DISEASES

Addison's disease	1
Anaemia, pernicious	3
Cancer	1
Cancer of abdomen	1
Cancer of bladder	1
Cancer of descending colon	1
Cancer of liver	5
Cancer of lung	1
Cancer of pancreas	1
Cancer of pelvis bone	1
Cancer of prostate	1
Cancer of rectum	4
Cancer of Retroperitoneal gland	1
Cancer of skull	1
Cancer of stomach	2
Cancer of uterus	5
Carcinomatosis, general	1
Diabetes Mellitus	4
Ephthelioma of Thorax	1
Goiter, Exophthalmic	1
Pseudoleukaemia	1
Pupura hemorrhagica	1
Septicemia	3
Septicemia, general	3
Tuberculosis of lungs	2
Tuberculosis, Pulmonary	4
Tuberculous Meningitis	1

DISEASES OF THE NERVOUS
SYSTEM AND OF THE ORGANS
OF SPECIAL SENSE.

Acute Pericarditis	1
Apoplexy	11
Apoplexy, Cerebral	6
Edema, Cerebral	1
Effusion, Cerebral	1
Embolism, Cerebral	1
Encephalitis	1
Encephalitis, Chronic	1
Hemorrhage, Cerebral	10
Meningitis	2
Meningitis, Tubercular	1
Meningitis, Typhoid	1
Pachymeningitis	1
Softening of brain	1
Status epilepticus	1
Tumor of brain	1

DISEASES OF THE
CIRCULATORY SYSTEM

Angina Pectoris	10
Arteriosclerosis	8
Arteriosclerosis, general	6
Congenital heart disease	2
Endocarditis	1
Endocarditis, Chronic	1
Heart, Dilatation of	1
Heart, Acute Dilatation of	10
Heart, Organic disease of	2
Heart, Valvular disease of	1
Mitral Regurgitation	4
Mitral Stenosis	1
Myocardial Insufficiency	2
Myocarditis, Chronic	2
Thrombosis, Cerebral	1
Valvular Insufficiency	1

DISEASES OF THE
RESPIRATORY SYSTEM

Asthma	1
Bronchial Asthma	1
Central Paralysis of Respiration	1
Hemorrhage, Pulmonary	1
Hypostatic Pneumonia	1
Pneumonia	3
Pneumonia following operation	2
Pneumonia, Broncho	6
Pneumonia, Broncho, following operation	1
Pneumonia, Lobar	8
Pneumonia, Traumatic	1

DISEASES OF THE
DIGESTIVE SYSTEM

Abscess of liver	1
Appendicitis	2
Cholera Infantum	3
Gastric Hemorrhage	1
Intestinal Obstruction	3
Intestinal Obstruction, Acute	1
Pancreatitis	1
Paralysis of bowels	1
Peritonitis	2
Peritonitis, Acute	1
Peritonitis, General	3
Syphilitic lesion of stomach	1

NON VENEREAL DISEASES OF THE GENITOURINARY SYSTEM AND ADNEXA

Cardiovascularrenal disease.....	1
Nephritis,	2
Nephritis, Acute.....	2
Nephritis, Acute Parenchymatous.....	1
Nephritis, Chronic.....	4
Nephritis, Chronic Interstitial.....	3
Nephritic and Dibetic Coma.....	1
Ovarian Cyst.....	1
Prostatitis.....	1
Pyelonephritis.....	1

THE PUERPERAL STATE

Partial loosening of placenta.....	1
Postpartum hemorrhage.....	1
Premature birth.....	8
Toxemia from eclamptic mother...	1
Transverse Presentation.....	1

DISEASES OF THE SKIN AND OF THE CELLULAR TISSUE

Gangrenous Stomatitis.....	1
----------------------------	---

DISEASES OF THE BONES AND OF THE ORGANS OF LOCOMOTION

Spontaneous fracture of femur....	1
-----------------------------------	---

MALFORMATIONS

Anencephalic Monster.....	1
Blue Baby.....	2
Malformation of head.....	1
Spina bifida.....	2

EARLY INFANCY

Hydrocephalus, Congenital.....	1
Malnutrition.....	1

OLD AGE

Senile Debility.....	5
Senility.....	3

EXTERNAL CAUSES

Accident, crushed chest, auto.....	1
Accident, shoulder and hip, industrial.....	1
Accidental, fractured skull, auto accident.....	4
Automobile accident.....	2
Concussion of brain.....	1
Fracture of hip.....	1
Fractured skull.....	1
Heat-prostration.....	1
Paralysis of Abdominal Nerves, caused by fracture of ver- tebrae.....	1
Suicide by hanging.....	1
Suicide by poisoning.....	1
Suicide by razor.....	1
Suicide by shooting.....	3
Still births.....	8

EPIDEMIC, ENDEMIC, AND INFECTIOUS DISEASES

Tuberculosis of intestines.....	1

ELLEN B. CRAMTON,
Treasurer.

The above accounts have been examined by me and found correct as stated.

ANZA B. NICHOLS,
Acting Auditor.

Feb. 16, 1925.

Report of the Board of School Commissioners

To the Mayor, the Board of Aldermen and the Citizens of Rutland:

I submit herewith the Report of the Board of School Commissioners of the City of Rutland for the year 1924-25.

During the past year over 2,100 pupils have received instruction in our public schools and, with the exception of the High School which will be treated of later, I can safely say that the conditions under which these children have worked during the past year have been most satisfactory. During the past two years the elimination of the ninth grade has worked to the disadvantage of the classes entering the High School. Today, however, pupils and teachers have adjusted themselves to a graded system of eight grades, the work in this department of our schools is proceeding in a very commendable manner and one unnecessary school year, which was formerly devoted to the anomolous ninth grade, has been eliminated.

THE TEACHING FORCE

The success of a school system depends very largely upon the teaching force. This is a rather overworked saying but true, nevertheless. Rutland has been particularly fortunate in being able to retain most of its teachers from year to year. Very few changes are made and for this reason teachers acquire a knowledge of the families whose children come to them and a familiarity with their home conditions, which is of inestimable value to them in their work. For efficiency and loyalty, I can commend most highly the teachers of Rutland in both the grades and High School.

THE DANA SCHOOL

In February, 1924, the Dana Building was badly damaged by fire; nearly 300 children were left without any school building. Adjustments were made and within 24 hours these children were being cared for, educationally, in other buildings. The building was repaired and ready for occupancy at the opening of school in September and, by reason of an arrangement entered into between the School Board and the city officials—an arrangement doubtless familiar to most of our citizens—these repairs were made without any extra burden to the taxpayer.

THE HIGH SCHOOL

The public is, doubtless, familiar with the overcrowded and unsatisfactory conditions existing in our High School. In April last, the Mayor appointed a committee to investigate and report on these conditions. The Committee reported in December and their report was accepted and adopted by the Board of Aldermen. This report called for a bond issue of \$500,000 for the purposes of a building project intended to remedy these conditions. At a special meeting, held recently, this plan was voted down by a very large majority of the voters, and at present there is no plan in sight for relieving the conditions that are just as bad now as they were six months ago. Those members of the School Board who advocated the plan recommended by the Mayor's Committee, endeavored to place all the facts available before the public and the taxpayers in rejecting the proposition so emphatically, certainly did so with a full knowledge of the necessities of the High School situation. It is rather humiliating to our civic pride that children of a city of the size of Rutland should be compelled to continue their education under such a handicap, but such appears to be the case, for another year at least, as, at the present writing, no alternative proposition seems likely to be presented at the March meeting. Any practical plan involving a smaller bond issue would, probably, be ample for the needs of a senior High School

for a number of years, and would, I feel certain, receive the hearty co-operation of the School Board. Such a plan would, however, necessitate the elimination of acquiring any additional land, of the Junior-Senior system of High School instruction, of a gymnasium and probably of a central heating plant. It is only fair to the taxpayers to emphasize these facts. I feel that the Mayor's Committee are entitled to the sincere thanks of the taxpayers for the thoroughness of their work and their public-spirited purpose. One thing at least is certain, our taxpayers are, now, thoroughly informed upon the situation, and such a general discussion is certain to be beneficial. As to the negative result, that is the rule rather than the exception in the first votes taken in other municipalities upon projects of such magnitude. Success usually comes later.

CONCLUSION

I trust that I may be pardoned a personal touch in concluding this report. I became a member of the School Board in 1904. Although not a product of the public schools, public school education has always been a hobby of mine. Twenty-one years of participation in any one branch of civic enterprise, is a considerable period. But one is amply repaid when the work goes well and the improvement is marked. I firmly believe, and I say this advisedly, that the schools of Rutland are and will continue to be a source of pride to our city. Many changes have taken place in the subjects taught and in the method of instruction, particularly in the High School, but such changes had to be made if our courses were to be maintained on the level with those elsewhere. Often I have doubted the wisdom of such innovations, and results have invariably shown that I was wrong. Often I have advocated the removal of some teacher, because their work had not seemed to "fit," and almost invariably I have seen that teacher return and, the difficulty removed, make a distinct success of his or her work. Last year it was my privilege to teach freshman civics and English in the High School, during the first semester, and this year I substi-

tuted for a like period in Senior United States History. In these few months, the self-satisfied college graduate and "veteran" school commissioner found that there were more things in the profession of teaching than were ever dreamed of in his smug philosophy. I only hope that my long suffering pupils learned as much as I did. This is the sixth report that I have written on behalf of the School Board, and in many ways the easiest. The easiest because I feel that the interests of the children intrusted to our care are guided by a most efficient teaching corps, that the interests of our school system are intrusted to a most efficient Superintendent and that the sound common sense of our taxpayers will soon find a solution for our present High School problem.

With sincere thanks and best wishes to my colleagues on the Board, I remain

Respectfully,

HARVEY R. KINGSLEY,

President Board of School Commissioners.

February 1, 1925.

Report of the Superintendent of Schools

*To the Board of School Commissioners, the Mayor, City Council
and Citizens of the City of Rutland:*

I have the honor of submitting to you the thirty-second annual report of the Rutland City Schools and the fourth under the present administration.

Out of an average attendance of 1,538 pupils in the six elementary schools and the intermediate school there were 1,487 who were still in attendance when the schools closed June 20, 1924. Of the latter number 1,275 had so profited by the work of the year that they were promoted to a more advanced grade. Those who failed of promotion, 212 in number, furnish one of the problems of school administration because it costs money for every pupil who repeats a grade. The diligence and persistence of the truant officer, the school nurse and the teachers keep the percentage of failure at a low point. The percentage of promotion, 85.7, is high, if one takes into consideration the sickness bound to come in childhood and the varying capacity of so many children. In spite of the loss of the Dana Building by fire last February, the children of that school lost little by failure of promotion. The home and the school co-operated to minimize the actual loss.

One hundred thirty-five pupils were promoted from the eighth grade to the High School. Of this number one hundred thirteen were registered in the first-year class in September, 1924. The number of pupils attending high school has increased of late years so that it has been necessary to offer something other than a classical or college entrance course in order that all these young folks may spend four years in high school

with profit to themselves and to the community. Eighty-five pupils completed a high school course in June, 1924, and were granted a diploma. Our High School is now represented by ninety-three students in thirty-five institutions of higher learning.

Four years ago the Board of School Commissioners adopted the very excellent policy of repairing completely one school building each year. Thirty-five hundred dollars, the amount of money available for this purpose, is, however, inadequate for the proper protection of the school property of the city. The Board has increased the amount by fifteen hundred dollars for 1925, but even this sum is too small by far. Five hundred thousand dollars is probably less than a sound valuation of our school properties. Good business policy dictates that we allow at least two per cent of such sound valuation for repairs on buildings, in good condition to start with, while three per cent would not be unreasonable for buildings as old as our school buildings. I strongly urge that the amount of the repair fund be raised to \$10,000 per year in order that the children may be comfortable and the interests of the city safeguarded.

A large percentage of our high school pupils suffers loss because of the present school day of only four hours which provides five periods. On the average, four and one-half of these periods are used in recitation, leaving only one-half of one period for study in the school room. We should address ourselves to this problem at once to see if we cannot find some way by which we may return to a normal school day of six hours that will meet with the approval of the community.

During the last few months our citizens have shown keen interest in the matter of physical education, which is a part of a widespread public awakening to the needs of the rising generation. Thirty-three states have already passed laws on the subject of physical education. Some states will not allow the erection of a new school building, of any grade, without the inclusion of a gymnasium. To the uninformed a gymnasium is a place in which to play basketball only. The use of a gym-

nasium for this purpose is of minor importance compared with its use as a place of recreation for all the pupils, both girls and boys. That our young people are as likely to receive the impulse which shall direct their lives into proper channels in the gymnasium, as in any class-room of a school, is recognized in every civilized country of the world.

I urge again the absolute necessity of a library in every school of the city. A school without a library is a contradiction of terms. A trained librarian in a school unit of sufficient size to warrant her employment is an investment which will pay large dividends.

The cost of education, like the cost of food, clothing, and shelter, has advanced at a rapid rate during the last twenty years and especially so the latter half of that period. The Board of School Commissioners and their agents have husbanded their resources with the greatest care, so much so, that improvements of great importance have been delayed from year to year. Our largest item of expense is in salaries, which have been advanced just far enough to allow the Rutland schools to compete on fairly equal terms, for teachers, with the other cities and towns of Vermont. A salary schedule for the teachers of the first eight years of public school education was adopted in December, 1923, which provides for annual increases of fifty dollars, until a maximum of \$1,300 is reached. The majority of our teachers in these grades will reach that maximum in the school year 1927-28. Experienced and competent teachers for the high school cannot be secured at a lower rate than we now pay. Salaries since 1910 have advanced as follows:

1910	\$41,209 18	
1915	51,103 06	Increase over 1910 of 24%
1921	87,041 41	Increase over 1915 of 70%
1925 (Est.)	119,167 00	Increase over 1921 of 36%

The year 1921 is used for comparison because that was the last year of a former administration.

The increase in the amount of money spent on salaries is caused partly by advances in the yearly pay of individuals and partly by an increase in the number of teachers employed. The employment of additional teachers was made necessary by the large increase in enrollment at the High School, the organization of the Intermediate School, the growth of school population in certain sections of the city and the desire of the Board of School Commissioners to reduce all classes to a reasonable size. The average size of classes is:

High School	27	pupils per teacher
Intermediate School	32	pupils per teacher
Elementary Schools	35.2	pupils per teacher

In 1921 we employed seventeen teachers in the High School, while this year we employ twenty-one. There were forty-two teachers in the elementary schools in the former year, while forty-seven are under contract at the present time. The number of special teachers and other employees has remained the same.

The increase in the cost of repairs has not been sufficient to place that item on a sound business basis, while the cost of supplies has not changed materially in a number of years. The amount we spend for text-books is so small per pupil that no one doubts its wisdom. Prudence dictated a considerable increase in the cost of insurance and our fuel costs are largely beyond our control. The other two items of expenditure, furniture and sundries, are so small and have increased so little in twenty years that consideration of them is not necessary.

I recommend, for the further improvement of the public schools of Rutland:

1. That temporary quarters be provided at the high school to allow a return to a normal school day in September, 1925.

2. That a new high school building be erected in the near future which shall furnish ample and modern facilities for the education of the children of Rutland.

3. That a substantial sum be spent each year on school libraries.

4. That ten thousand dollars be the sum appropriated each year for repairs.

5. That additional facilities for physical education be provided.

Respectfully submitted,

W. W. FAIRCHILD.

Superintendent of Schools.

Rutland, Vermont, February 2, 1925.

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools and Sinking Fund Commissioners from January 1, 1924, to December 31, 1924, inc., and find they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the City Treasurer's books. We have checked the cash and verified the notes, bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The Treasurer's book shows a balance of uncollected taxes as follows:

1904-7-8-12-13-17-18	\$131 43
1919	167 29
1920	316 86
1921	408 11
1922	251 26
1923	566 33
1924	4,286 40
	<hr/>
	\$6,127 68

The books and records of the City Treasurer's office are in excellent shape and very clearly show the city's true condition.

Respectfully submitted,

R. D. SMITH,
W. T. SIMONDS,
H. A. COLBURN,
City Auditors.
